Summary

Full-Stack & AI/ML Developer with **4+ production-grade projects** and **2 internships** in professional Agile environments, specializing in **LangChain**, **RAG pipelines**, **IoT integration**, **workflow automation**, and **React** — seeking impactful roles in AI-powered product development and intelligent systems.

Education

Dr. A.P.J. Abdul Kalam Technical University
Bachelor of Technology in Computer Science and Engineering
• CGPA: 7.68/10.0

Uttar Pradesh, India
Aug. 2022 – Jun. 2026

Central Board of Secondary Education (CBSE)
Senior Secondary Education (Class XII)
• Percentage: 86.7%

India
2021 – 2022

Work Experience

AI Developer Intern
Codebyte Solutions

Apr. 2026 – Present
India

- Developing **AI-powered IoT solutions** integrating smart hardware with cloud-based ML models for real-time data processing and analytics.
- Building **workflow automation systems** using **n8n** to streamline business processes, reducing manual intervention by **~80%**.

Software Engineer Trainee
Primus Software Development India Pvt. Ltd.

Jul. 2025 – Aug. 2025
India

- Contributed to frontend module development using **React.js**, implementing reusable UI components within a production-grade codebase.
- Gained hands-on experience with **Agile/Scrum** workflow, participating in sprint planning, daily standups, and code reviews.
- Practiced **version control** best practices using **Git** and **GitHub**, including branching strategies and pull request management.

Projects

LinkedIn Automation & CRM Integration | *n8n Workflow Orchestration*

- Tech Stack:** n8n, LinkedIn API, Webhooks, PostgreSQL, REST APIs, JavaScript
- Designed **end-to-end automation workflows** for LinkedIn lead generation, connection management, and message sequencing using n8n.
- Integrated **multi-platform CRM sync** (Salesforce, HubSpot) with intelligent lead scoring, reducing manual data entry by **~75%**.
- Implemented **webhook-based triggers** and conditional logic for personalized outreach campaigns, increasing engagement rates by **~40%**.

Asterix Find | *AI Job Discovery & Auto-Apply Platform* | [GitHub](#)

- Tech Stack:** React, TypeScript, FastAPI, Hugging Face Transformers, Sentence Embeddings, Firebase
- Built a **semantic resume-to-job matching engine** using Sentence Transformers, achieving **85%+ relevance accuracy** in surfacing best-fit roles.
- Automated end-to-end job discovery and **auto-apply pipeline**, reducing manual job search effort by **~70%** and processing **50+ job listings per session**.

AI YouTube Summarizer & Conversation Plugin | [GitHub](#)

- Tech Stack:** Python, Generative AI, LangChain, RAG, YouTube Transcript API, Vector Database
- Built a **RAG pipeline** over YouTube transcripts enabling conversational Q&A, **cutting video review time by ~60%** for users.
- Integrated **vector embeddings** for semantic retrieval supporting videos up to **2 hours**, maintaining accuracy across **10+ follow-up queries** per session.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript (Intermediate)

Web Development: React.js, React Native, Node.js, FastAPI, Tailwind CSS, Firebase, REST APIs

AI / ML: Generative AI, LangChain, RAG, TensorFlow, Hugging Face, Agentic AI, Vector Databases

IoT & Automation: MQTT, n8n, Workflow Orchestration, Sensor Integration, Webhook APIs

Tools & DevOps: Git, GitHub, VS Code, Agile/Scrum, Docker (Basic)

Certifications & Achievements

Qualcomm AI Upskilling Certificate – Technical Foundations (AI/ML Specialization)

Python (Basics) Certificate – HackerRank | Achieved **5-Star** rating in Python on HackerRank, demonstrating advanced coding proficiency.

LeetCode Problem Solving – Solved **80+ problems** in Python, strengthening Data Structures & Algorithms (DSA) skills across arrays, trees, graphs, and dynamic programming.
